# How does Personal Data Protection work in your company?

- Can you see data flowing in and out of your company? Do you wonder how easy the information flow in the e-world is?
- Does your company have a number of various databases, e.g., databases of customers, clients, business targets, marketing targets, employees or former employees?
- Can you clearly distinguish what personal data is?
- Do you believe your company has nothing to do with the Office for Personal Data Protection?
- Do you send bulk e-mails occasionally? Can you distinguish these from unsolicited business communications (spam)?
- Have you ever thought of the Office for Personal Data Protection's controllers coming to your company?

## How we can help you

- Implement a comprehensive personal data protection solution on a multinational level developed especially for multinational companies by a chain of law firms associated with PricewaterhouseCoopers.
- Implement a comprehensive personal data protection solution on a national level for local companies.
- Confirm successful completion of a thorough review and compliance with legal personal data protection and processing requirements by way of annual certification.
- Review compliance of personal data operations with the applicable rules, including transfer of personal data abroad or within the Czech Republic.
- Perform a tailor-made personal data protection and processing due diligence.
- Identify risks connected to your company's current practice and propose effective changes to be made in documents used by your company, processes and e-communications. We can draft all necessary documents, e.g., contracts on data processing, global and national policies, corporate binding rules, internal guidelines and consents.
- Implement proposed changes directly in your office, train your responsible employees and assist them during the learning process.
- Represent your company in negotiations with the Personal Data Protection Office.
